120 Stone Creek Blvd, Suite 900, Flowood, MS 39232

Phone: 601-936-6500 Fax: 601-936-2027

Open MRI of Jackson, now also known as Flowood Physicians' Imaging, is pleased to announce the addition of our new Computerized Tomography (CT) services to our Open Magnetic Resonance Imaging (Open MRI) and X-Ray services. Our services give the local and regional medical community an out-patient imaging option with 3 goals in mind—to obtain superior image quality, to receive a thorough report within a short amount of time, and to ensure that patients are getting the services that they need at a reasonable cost.

Our Open MRI scanner has a larger diameter than the traditional tunnel-type MRI scanner and gives excellent image quality. The scan time is much quicker and provides comfort to all patients including patients with larger body habitus or claustrophobic patients.

Since Open MRI of Jackson/Flowood Physicians' Imaging is an independently owned, out-patient facility, we can offer our services at much lower rates than other imaging facilities and hospitals. Our prices are also global, which means that our patients only receive one bill—not a separate bill for a reading fee.

Jackson Open MRI/Flowood Physicians' Imaging is one out of seven imaging facilities within the Southern Radiology Specialists network that spans across Mississippi, Alabama, and Florida. Our owner, Dr. Ross W. Barnett, spends his time reviewing images and rendering reports for physicians who refer their patients to any of our facilities. "I take the responsibility of interpreting images very seriously and give each exam my full attention, as behind the images I see, there is a person—someone's mother, father, spouse, or child," says Dr. Barnett. His medical background began at the Medical College of Georgia School of Medicine where he graduated with highest honors summa cum laude and

scored in the top 1% on all 3 medical board exams. His post-medical background includes Residency training in Neurosurgery and Pediatric Intensive Care before Radiology, so he has extensive diagnostic and clinical experience in Neurological conditions and Imaging. He also has comprehensive training in Musculoskeletal Orthopedic Imaging, having completed a visiting fellowship under world-renowned Dr. Stephen Pomeranz in Cincinnati, Ohio. His Radiology training at UAB afforded him world-class Diagnostic Radiology, Body Imaging, and Fluoroscopy training. He is board certified by the American Board of Radiology. Dr. Barnett was raised in the South where he has also raised his three children and continues to reside.
